

Choline chloride

Product Information

Chemical Name	Choline chloride
CAS#	67-48-1
Formula	C ₅ H ₁₄ ClNO
Molecular Weight	139.62
Chemical Structure	

Physical Properties

Melting point	298-304°C
Water solution	Soluble

Specification

Choline Chloride 50% Silica
Choline Chloride 50% Corn
Cob Choline Chloride 60%
Corn Cob Choline Chloride
70% & 75% Liquid Choline
Chloride 98% Crystal

Safety

Always refer to the Material Safety Data Sheet

(MSDS) Applications

- Tissue culture medium, feed additives, clinical used for resisting fatty liver.
- As a feed additives
- Used in the treatment of fatty liver disease and cirrhosis of the liver, also used as feed additive, can stimulate the ovaries produce more eggs, litter, livestock, fish weight gain, etc
- Choline chloride can effective prevention and treatment of livestock and poultry fatty deposits within the organ and tissue degeneration. Can promote the absorption of amino acids and synthesis. Can enhance constitution and disease-resistant ability of livestock and poultry, promote growth and development, and improve the poultry rate. Use 1-2 g/kg.

Packaging

25kg/bag, 200kg drum, or 250 kg drum
